RESUME

ABOUT

Creativity has always been my way of connecting with the world. This portfolio is a sacred space, a reflection of my hard work, where design manifests meaning, beauty, and emotion. Each project is an offering, shaped by passion, curiosity, and the belief that visuals hold the power to move and inspire. I hold a degree in Visual Communication Design from San Francisco State University and I'm now pursuing my Master's in Design — learning has always been part of my practice, and school keeps me curious, open and constantly evolving.

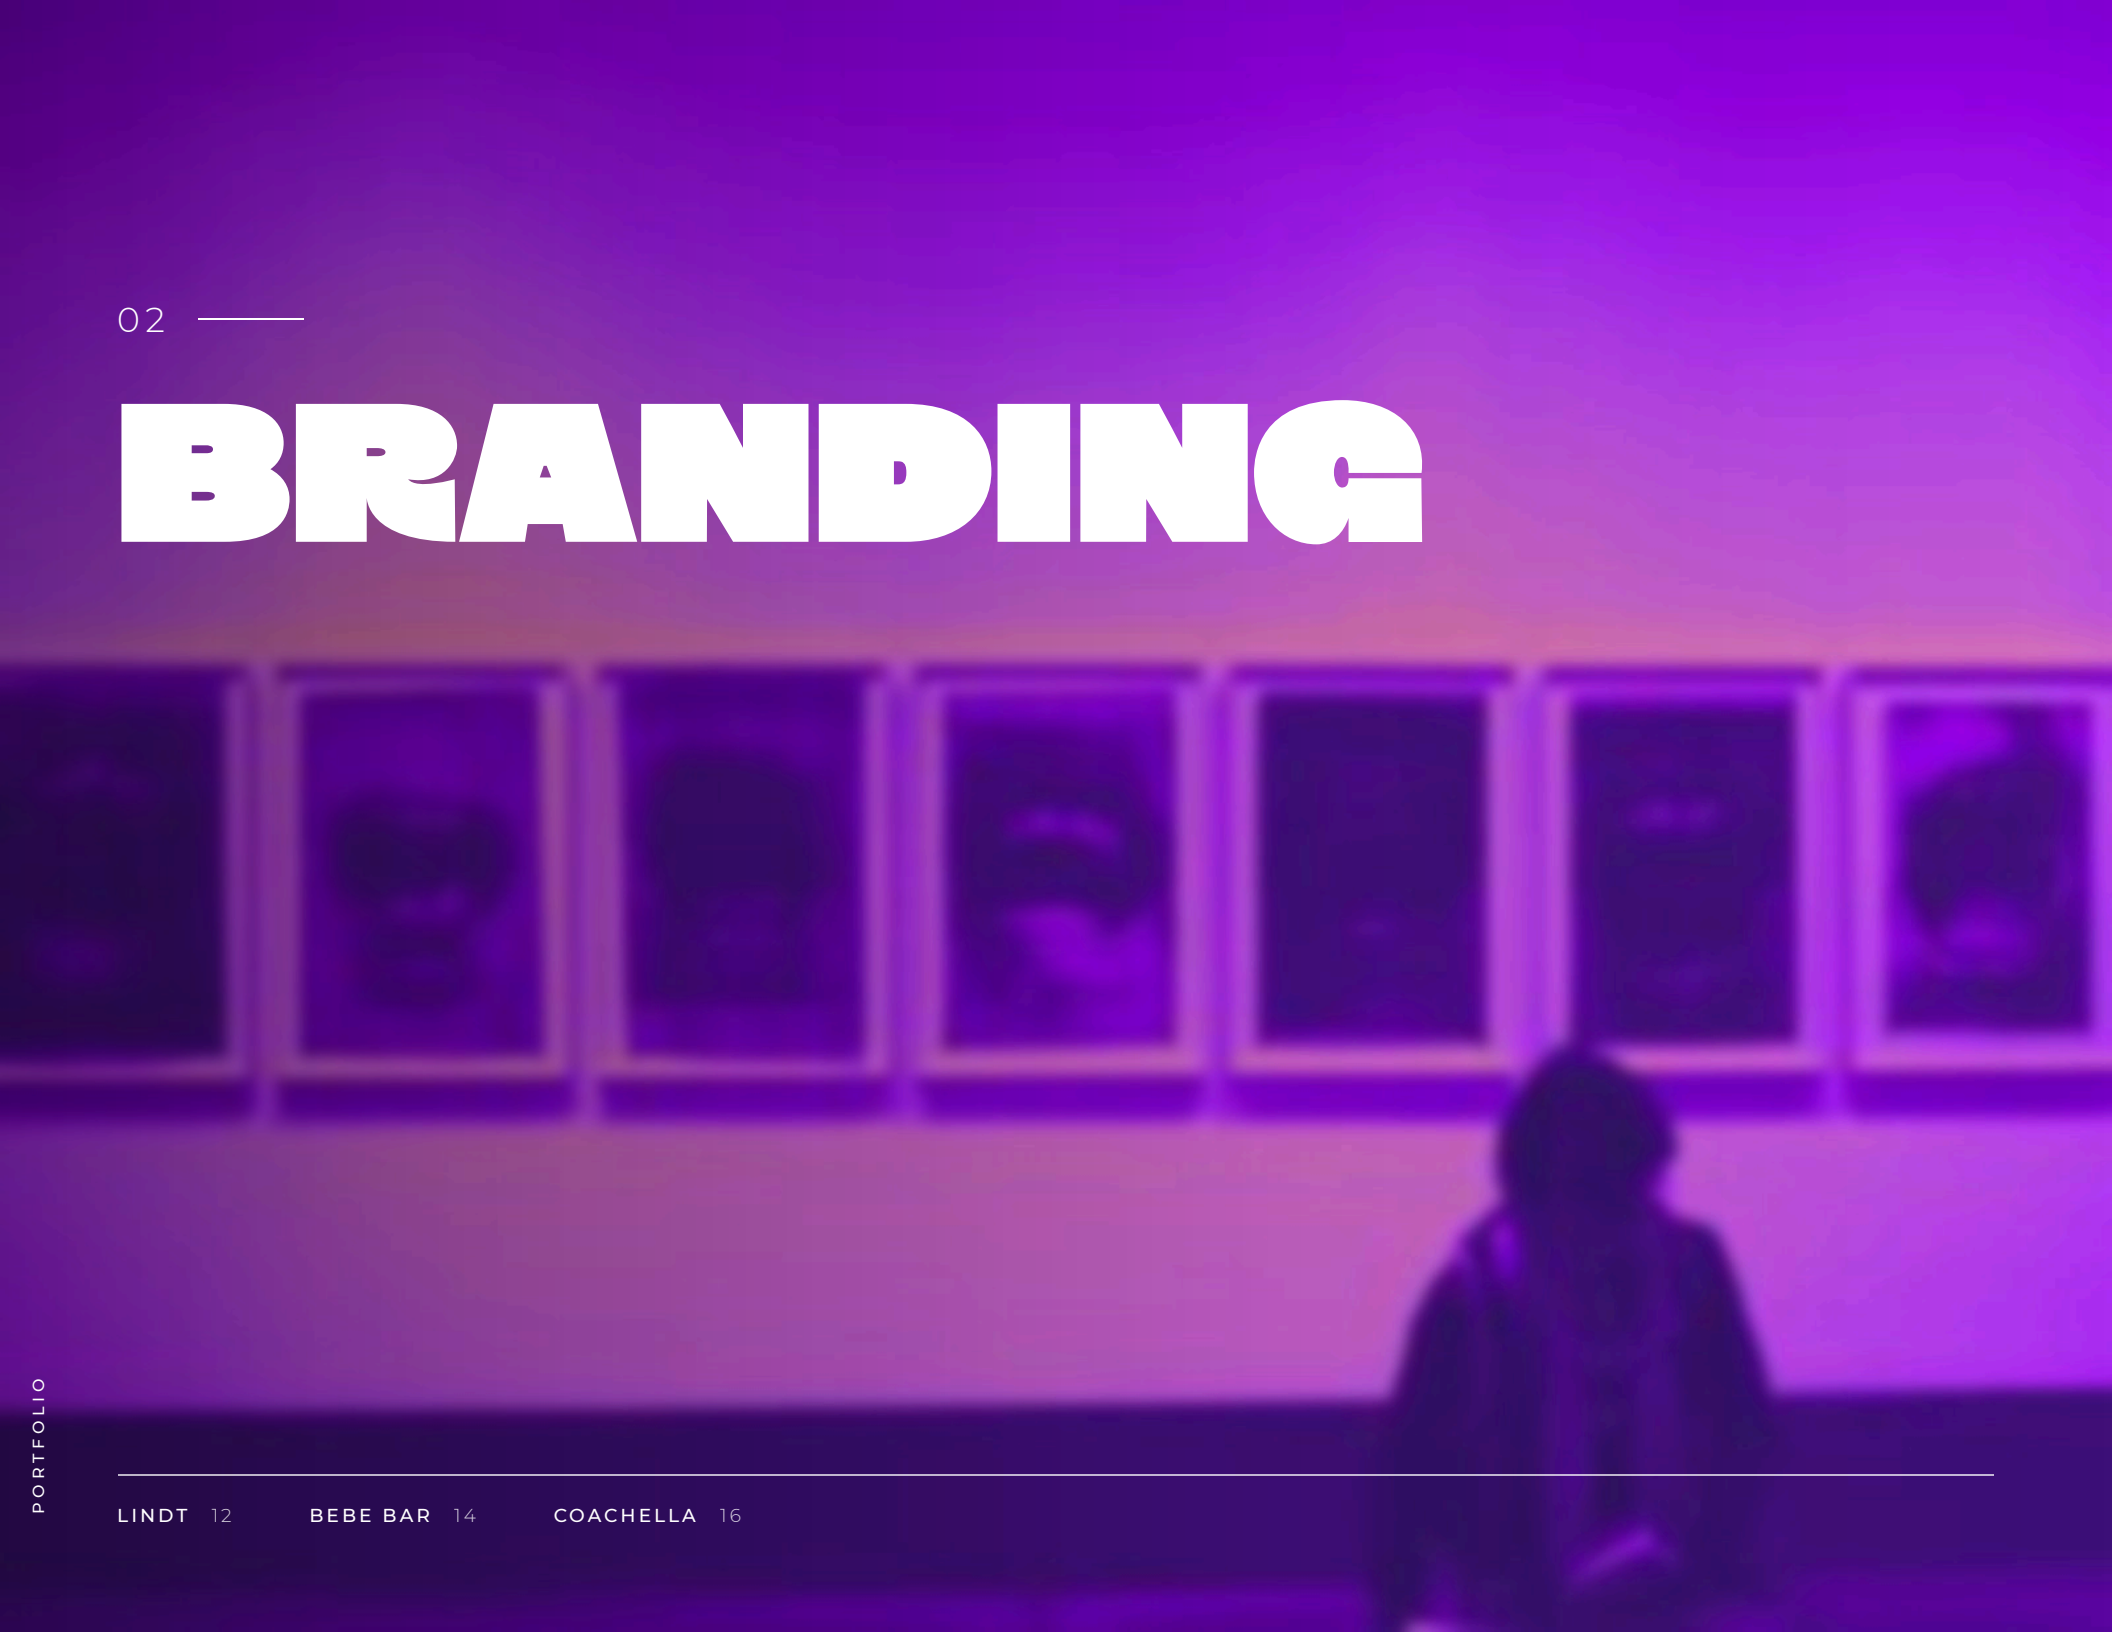
BRANDING



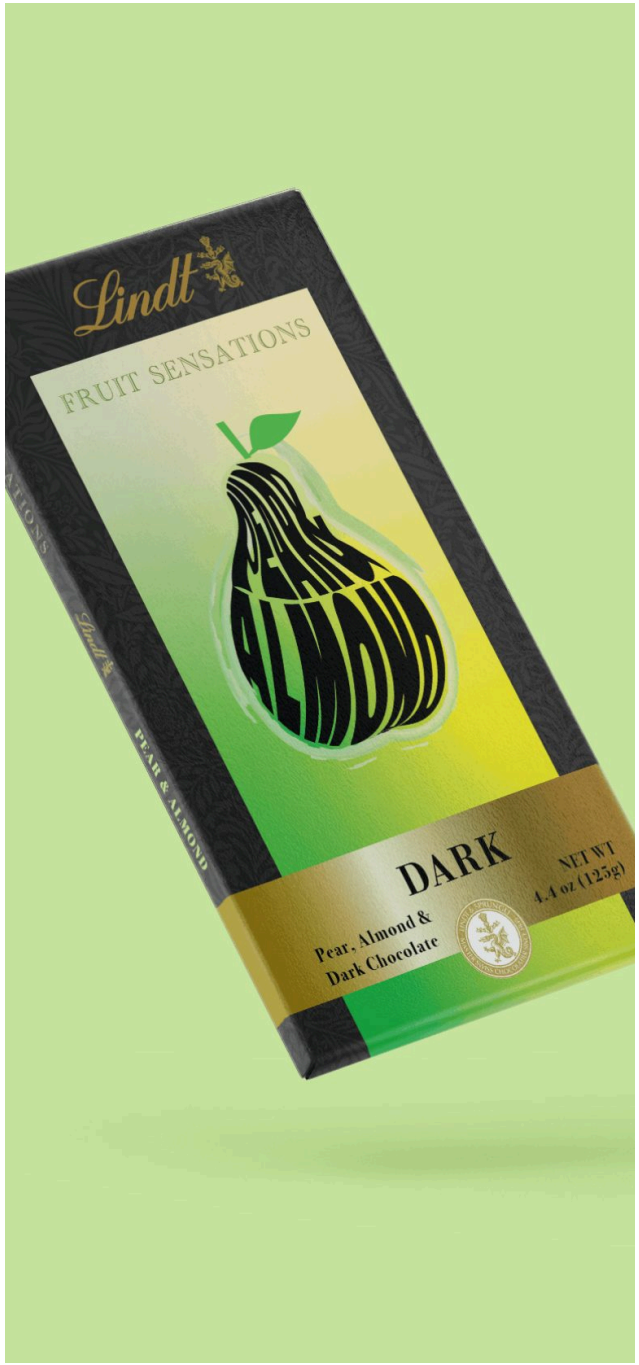
LINDT 12 BEBE BAR 14 COACHELLA 16

BRANDING

LINDT

BACKGROUND

The aim of this project was to develop a new chocolate series for Lindt, targeting a younger audience while considering competitors and brand communication audit. My task was to create a strong brand identity by conducting thorough research and developing mood boards. The final result is a unique and compelling brand identity that effectively communicates Lindt's values and appeals to a wider audience.



DIELINES

LINDT & SPRÜNGLI
The Finest Cocoa
Our chocolate's unique taste is rooted in our bean to bar philosophy, beginning with the careful selection of high-quality cocoa beans from the world's most renowned regions.
This philosophy is why we built our own sustainable cocoa bean supply chain, and makes Lindt & Sprüngli one of the few chocolate makers to have complete control over every step of the process behind crafting gourmet chocolate, from bean selection to the final product.
We believe high-quality chocolate can only be made with high-quality ingredients. Just as we select our cocoa beans from renowned places in the world, we source our other ingredients from the preeminent regions across the globe. And we take the same care processing these ingredients as we do sourcing them.

LOGO DESIGN

BEBE BAR

BACKGROUND

Bebebar is an artistic healthy cafe that attracts latinos, LGBTQI+ community and general crowd that hangs out at Dolores park. Customers usually love their açai bowls and are looking for refreshing organic drinks. However the place doesn't have as many customers as it should, as a business located in one of the most crowded areas of the city.

SOLUTIONS

Rebranding their logo would help create value in building artistic community, change customer's perspective to a more trustable place, it would better reflect the food offered there and the Brazilian culture it represents. Maintaining current customers and attracting more people that are thirsty for a fresh organic drink after a long day at the park.

BRANDING + INSTAGRAM CAMPAIGN

COACHELLA

This initiative aims to revamp the Coachella Valley Music & Arts Festival's visual identity. Research reveals concerns about high costs, accessibility, and inclusively. To tackle these issues, a new identity is being developed, utilizing an Instagram campaign to engage a wide audience and prompt a reassessment of Coachella's priorities.

the instagram filter created for the campaign was tested in people with different ethnicity to make sure it works with everyone and support inclusion values that align with the brand.

TOOLS

BRUXARIA

A blackletter designed to be read — calligraphic detail balanced for body text.

TYPE
Text typeface

BUILT WITH
Drawn outlines in Glyphs

MOOD
Esoteric, calligraphic

USE
Body text, editorial

FONT PROFILE

On my journey to make a esotric blackletter typeface, the challenge was to translate calligraphic features into the digital realm. Finding balance between too detailed and too simple, and understanding the impact of different tops and bottoms of glyphs, when used in body text. Since this style is usually tight and very conscistent, any detail can become very loud and break the structure.

CUSTOM LETTERING

HOOD RITUAL

One-off lettering for a skate brand — a wordmark built to live on decks, caps and hoodies.

BRIEF

This project creates custom blackletter-inspired typography for HOOD RITUAL, blending the raw grit of street culture with the mysticism of occult philosophy. Blackletter, historically tied to medieval manuscripts, grimoires, and witchcraft, symbolizes sacred knowledge, mystery, and spiritual power. This design captures the symbology of blackletter and occultism through its gradients and structure, evoking a sense of darkness and ritual. It reflects HOOD RITUAL's journey—a fusion of underground hip-hop roots, personal resilience, and a bold vision for honoring

F*ck Content

By Michael Rock, 20009

In Dedgner as author I argued that we are insecure about the value of our work. We are envious of the power, social position and cachet that artists and authors seem to command. By declaring ourselves "designer/authors" we hope to garner similar respect. Our deep-seated anxiety has motivated a movement in design that values origination of content over manipula- tion of content.

Designer as Author was an attempt to recuperate the act of design itself as essentially linguis- tic—a vibrant, evocative language. However, it has often been read as a call for designers to generate content: in effect, to become designers and authors, not designers as authors. While I am all for more authors, that was not quite the point I wanted to make.

The problem is one of content. The misconception is that without deep content, design is reduced to pure style, a bag of dubious tricks. In graphic-design circles, form-follows-function is reconfigured as form-follows-content. If content is the source of form, always preceding it and imbuing it with meaning, form without content (as if that were even possible) is some kind of empty shell.

The apotheosis of this notion, repeated ad nauseum (still!), is Beatrice Warde's famous Crystal Goblet metaphor, which asserts that design (the glass) should be a transparent vessel for con- tent (the wine). Anyone who favored the ornate or the bejeweled was a knuckle-dragging oaf. Agitators on both sides of the ideological spectrum took up the debate: minimalists embraced it as a manifesto; maximalists decried it as aesthetic fascism. Neither camp questioned the basic, implicit premise: it's all about the wine.

This false dichotomy has circulated for so long that we have started to believe it ourselves. It has become a central tenet of design education and the benchmark against which all design is judged. We seem to accept the fact that developing content is more essential than shaping it, that good content is the measure of good design.

Back when Paul Rand wrote "There is no such thing as bad content, only bad form," I remem- ber being intensely annoyed. I took it as an abdication of a designer's responsibility to meaning. Over time, I have come to read it differently; he was not defending hate speech or schlock or banality; he meant that the designer's purview is to shape, not to write. But that shaping itself is a profoundly affecting form. (Perhaps this is the reason that modern design ers—Rand, Munari, Lesni—always seem to end their careers designing children's books. The children's book is the purest venue of the designer/author because the content is negligible and the evocative potential of the form unlimited.)

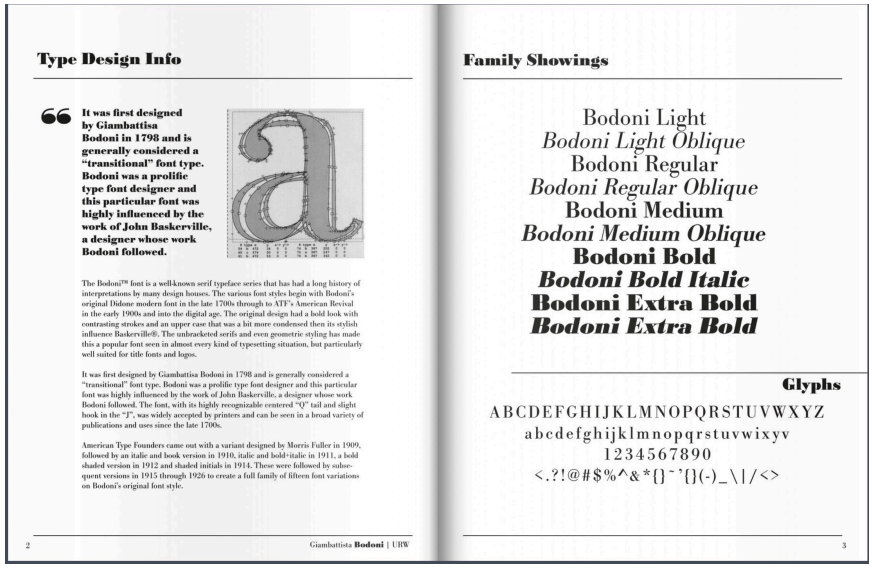
So what else is new? This seems to be a rather mundane point, but for some reason we don't really believe it. We don't believe shaping is enough. So to bring design out from under the thumb of content we must go one step further and observe that treatment is, in fact, a kind of text itself, as complex and referential as any traditional understanding of content.

A director can be the esteemed auteur of a film he didn't write, score, edit or shoot. What makes a Hitchcock film a Hitchcock film is not the story but a consistency of style, which winds intact through different technologies, plots, actors, and time periods like a substance of its own. Every film is about film-making. His great genius is that he is able to mold the form into his style in a genuinely unique and entertaining way. The meaning of his work is not in the story but in the storytelling.

Designers also trade in storytelling. The elements we must master are not the content narra- tives but the devices of the telling: typography, line, form, color, contrast, scale, weight. We speak through our assignment, literally between the lines.

The span of graphic design is not a history of concepts but of forms. Form has evolved dra- matically from one year to the next, and suggests a profession that continually revises

9



Type Design Info

It was first designed by Giambattisa Bodoni in 1798 and is generally considered a "transitional" font type. Bodoni was a prolific type font designer and this particular font was highly influenced by the work of John Baskerville, a designer whose work Bodoni followed.

The Bodoni™ font is a well-known serif typeface series that has had a long history of interpretations by many design houses. The various font styles begin with Bodoni's original Didone modern font in the late 1700s through to ATF's American Revival in the early 1900s and into the digital age. The original design had a bold look with contrasting strokes and an upper case that was a bit more condensed then its stylish influence Baskerville®. The unbracketed serifs and even geometric styling has made this a popular font seen in almost every kind of typesetting situation, but particularly well suited for title fonts and logos.

It was first designed by Giambattisa Bodoni in 1798 and is generally considered a "transitional" font type. Bodoni was a prolific type font designer and this particular font was highly influenced by the work of John Baskerville, a designer whose work Bodoni followed. The font, with its highly recognizable centered "Q" tail and slight hook in the "J", was widely accepted by printers and can be seen in a broad variety of publications and uses since the late 1700s.

American Type Founders came out with a variant designed by Morris Fuller in 1909, followed by an italic and book version in 1910, italic and bold-italic in 1911, a bold shaded version in 1912 and shaded initials in 1914. These were followed by subsequent versions in 1915 through 1926 to create a full family of fifteen font variations on Bodoni's original font style.

BLACK PANTHERS

The Black Panther Party was founded 50 years ago in Oakland, on Oct. 15, 1966, and within two years it had chapters across the country. The New York Times is taking this opportunity to explore the Black Panthers' legacy, through their iconic use of imagery and how they were covered in our own pages.

The Black Panther Party is often associated with armed resistance, but one of the most potent weapons in its outreach to African-Americans in cities across the country was its artwork. In posters, pamphlets and its popular newspaper, The Black Panther, the party's imagery was guided by the vision of Emory Douglas, its minister of culture.

His art came from many sources. As a teenager in San Francisco during the late 1950s and early 1960s, Mr. Douglas found himself incarcerated at the Youth Training School in Ontario, Calif., where he got involved with its printing shop. study graphic design at San Francisco City College, where he developed a deep interest in the Black Arts Movement, the artistic arm of the Black Power Movement.

His particular background, a combination of art, printmaking and activism, eventually attracted the eye of the Black Panther co-founder Bobby Seale, and led to Mr. Douglas's becoming a central figure in the party. The newspaper's circulation eventually climbed to over 200,000, making it one of the most popular black newspapers of its day. In the years since the party's demise, Mr. Douglas's posters have come to be known as iconic artifacts of their era.

»Fig.6,7,8(L to R) »Fig.5(top)

POWERFUL WOMEN

"

My daughter's mother worked with me designing for The Black Panther newspaper. There was also Tarika Lewis, who was the first artist that worked with me on the newspaper as an artist. And then there were many other women who contributed to the production of the newspaper. The women depicted in my artwork are a reflection of the party. Women went to jail and were in leadership roles. Women started chapters and branches of the Black Panther Party as well. When we used to read some of the stories, you would see women in the Vietnam and Palestine struggle and in the African liberation movement. Women were an integral part of those movements so all that played into how I expressed them in my own artwork."

-DOUGLAS, Emory
